Profile

Currently in my second year of University and I am looking for a part-time/casual job. I am very eager to be introduced to career around using computers and technology. Learning these new skills will help me with my current studies and give a good running start to my career choice. If given the chance to start, I will be dedicated to doing any work given to me. My strengths are that I am very people-oriented, good with teamwork, cooperating with others, and willing to improve with criticism. When given a task I will be dedicated and focused on completing the set work.

Career Objectives

I am a third year Software engineering student looking for a remote job involving in computers and technology. My skills will be of use as I have an extent knowledge in computers.
